

Unique:
Our key advantages at a glance

		staub <i>designlight</i> luminaires	Competitors
Individuelle Leuchten-Sets	+	All cable sectional areas are determined according to the required length to ensure all luminaires deliver optimal brightness.	Customers are only offered standard cables or must procure the cables themselves. Consequently, the brightness of the luminaires may vary when using different cable lengths.
Transformer	+	Transformers provide different output voltages and are individually sized subject to the number of luminaires and their wattage. We thus ensure optimal brightness and maximum lamp life.	All standard transformers provide an output voltage of 11.5-14 V. Too low a voltage rating may restrict the required lamp brightness. Too high a voltage rating may damage the lamps (bulbs) after a short time.
LED	+	Thanks to our unrivalled, patented module technology, subsequent conversion from halogen to LED lamps is possible at any time.	Subsequent conversion of halogen lamps fitted in the luminaire to LEDs is not usually possible.
Luminaire installation	+	All customized luminaire sets are delivered ready to connect. They are installed and ready for operation in no time.	Customers need to assemble the connecting cables themselves, which significantly increases the amount of time spent on the building site.
Luminaire usage	+	All luminaires are suitable for use above or below water in all light levels.	Halogen lamps of 35/50 W output power are usually only suitable for use below water since high operating temperatures may damage the lamps when used above water.
Warranty	+	All staub <i>designlight</i> products manufactured in-house come with a seven-year guarantee.	The luminaires come with a standard warranty of two years, which is also often limited to some extent.
Production	+	Made in Switzerland: All luminaires are individually manufactured for you by our committed team.	The luminaires are manufactured mainly in China.
Support	+	Individual and competent support and advice are a matter of course for us.	Individual and competent support and advice are a matter of course for us. We shall be happy to assist you and your customers with the design of your lighting projects by phone or on site.
After Sales Service	+	We shall be happy to assist you and your customers with the design of your lighting projects by phone or on site.	After sales service - if available at all - is only provided by phone or in writing.
